

**AMENDMENTS TO THE ABSTRACT:**

Please amend the abstract as follows:

**Abstract of the Disclosure**

The invention relates to a magnet valve for actuating a fuel injector, having a magnet core (2). ~~A~~ and a magnet coil (3) ~~is~~ received in the **magnet** core. A closing spring (9) acts on the magnet armature (10) in the closing direction. An outlet gap (18) for an actuating fluid is  
5 formed between a face end (8) of the stop sleeve (7), oriented toward the magnet armature (10), and the magnet armature (10) itself. The outlet gap (18) discharges into a hydraulic damping chamber (31), which is defined by a face end (12) of the magnet armature (10) and by a damping face (20) of the non-magnetic material (16).
